LOW RATE GIVEN ON H.B. ROUSE
IS THE KAISER TO BE RESTORED?
BOGUS COIN GANG IS CAUGHT
BURNS COINAGE-INCREASE PRICE
MEDICOS TAKE STAND ON FEES

OTPAWA, June 29.—A 20 per cent reduction in the special marine insurance rates on vessels operating in the Hudson Bay and Hudson Straits, between August 10 and September 30 is decided upon in the report of the Imperial Committee made public here today. The reduction applies to the premium paid on such vessels over and above the ordinary marine insurance, and will operate during the navigation season of 1932.

BERLIN, June 28.—Although the Hohenzollern family issued its customary denial of plans to restore the former Kaiser today, there was a deal of evidence that his family stock is on the rise in Germany.

This is indicated by the fact that the former monarch is now appearing regularly in parades and demonstrations by war veterans, where he usually reviews troops beside officials of the former soldier's organizations.

Der Aufrechter, Berlin monarchist organ, currently expressing the opinion that following the downfall of the Weimar cabinet, the "monarchy is the necessary final organ."

BERGANA.—Charles Ruby, self-confessed Alberta run-ner and U.S. deportee, following a day-long hearing in city police court here on charges of possession with intent to utter counterfeit coins was remanded. Ruby was arrested recently while with two partners, Fred Brown and George Mason were arrested June 11 after they had passed bogus half-dollars to a service station proprietor.

"In the back room to that of Ruby's at a local rooming house, was found a collection of tools and material, which police declared was used for making bogus coins. Also found later was a sack full of counterfeit 50-cent pieces."

The Brazilian Coffee Council have definitely and irrevocably abandoned the plan to pay premiums to United States coffee merchants who use more Brazilian coffee. The plan of the council is to continue the destruction of surplus coffee by burning it in a whole way. Already 6,500,000 sacks have been burned and by January 1, 1932 a total of 13,000,000 sacks, each containing 132 lbs. of coffee will thus be destroyed. At approximately \$1.50 per sack, \$19,500,000 worth of coffee will have been burned into smoke and ash. Brazilians are convinced that their plan is ahead and that the results are a valuable result already achieved. Brazilian coffee growers have risen in New York about 40 per cent since the coffee bonfire were lighted last year.

The Ontario Medical Association has adopted a resolution endorsing the principle that medical care now given to the public patients free should be paid for.

During the day the Canadian Association reached a decision that physicians and surgeons are not bound by any professional oath to render services for which they are not paid.

Members of the Canadian Association estimated the medical profession in Canada during the past year will give away services worth about forty million dollars. They estimate also, at the present time 25 per cent of the population of Canada is unable to pay for medical attention, while another 35 per cent is able to make only part payment.

I think I should have named the baby "Planner" said Mrs. Hink. "Who?" and Mrs. Hink said, "Because," answered Mrs. Hink, "the shrink from washing."

STAMPEDE AND EXHIBITION AT CALGARY, JULY

Prize List Maintained in Spite of Trying Times in West

BIGGER AND BETTER

The Calgary Exhibition and Stampede will be held this year on July 11th to 14th and will include the most outstanding programme ever organized for Calgary's annual celebration. It will require all available space on the Exhibition Ground to house exhibits. The Stampede will once more bring together the most outstanding riders of this continent and approximately 20,000 people will be represented in the duck wagen race.

The week's celebration will open with the mammoth Stampede Parade at 10 o'clock on Monday morning, which each year is enjoyed by between fifty and sixty thousand people. Judging of live stock will be done on Tuesday, Wednesday and Thursday, and on Friday morning the live stock review will be staged in front of the grandstand. Last year between thirteen and fourteen thousand people packed the grandstand and enclosure to witness this new feature. This year Burns & Co., Ltd. in presentation of the Duck Wagen from the Prince of Wales ranch, the North Star Oil Ltd. is presenting a Shetland pony and the Ontario Landers are presenting two dogs to girls and boys under 16 years of age who are present at the review. Free tickets of admission will be distributed to them in the various schools within a radius of fifty miles of Calgary, and any teacher outside that area may obtain tickets for school boys and girls of that age by writing to the Exhibition manager.

The grand stand presentation includes a wonderful production called "Canada Marching On," which will be participated in by about 150 artists and which will include some of the best vaudeville features ever presented for the Calgary fair.

The week's features include morning steeple chasers on Tuesday, Thursday and Friday mornings, the Cowboy and Old Times Ball Friday night, one of the greatest fireworks programs ever staged on Saturday night. A free accommodation booth will be located in front of the C.P.R. station, where hotel or private rooms may be obtained.

Grand Forks to Have Sports Day

Two interesting games of ball were played at the annual sports day of the P. A. A. on Sunday afternoon. One game—and a very interesting game—was between the married men and the single men. In the evening, the final score was 3-5 for the married men.

The Grand Forks Athletic Association will hold a picnic and sports day on Wednesday, July 6th. This will be their first sports day and it is planned to make the event an annual affair. At the time of the sports day, the program of entertainment is being planned. There will be a number of ball games, children's races, peanut races, and other amusements. In the evening the committee in charge of arrangements will put on a monster dance and if plans are carried out this event will be an open air affair. Watch for the posters in the very near future announcing this sports day to be held at Grand Forks.

WEDDINGS

WRIGHT-SMITH
A beautiful and interesting wedding was celebrated at the United Church, Carbon, on Sunday June 26th, at 10.30 a.m., when Isabelle Marie Smith, eldest daughter of Mrs. Fred Dixon of Carbon, became the bride of Dr. Albert James Wright, son of Mr. and Mrs. S. N. Wright, Carbon. Rev. Wm. McNeil, minister of Carbon United church officiated.

The church was tastefully decorated for the occasion with a profusion of cut flowers arranged in the form of an arch, which was entered with a large white wedding bell. The pews for the invited guests were decorated with bouquets of white tulips and ribbons.

As the strains of the Bridal Chorus were being played by Mr. R.J. Fairbank, the bride entered the church on the arm of her step-father, Mr. W. Poxon, who gave her in marriage, she made a striking picture in her gown of white lace and coronet, her long bridal veil being caught close to the head with orange blossoms. She carried a bouquet of pink roses and white lilies.

The bride was attended by her cousin, Miss Helen Smith, of Carbon, who were wearing a gown of green tulle, and the bridesmaid, Miss M. Poxon, carried a bouquet of pink and white carnations.

The groom was attended by Mr. H. Poxon, of Carbon, who carried a bouquet of white lilies. During the signing of the register Mrs. S. P. Torrance sang "Oh, Promise Me," and the hymn "Doxology" was sung from the Prince of Wales ranch.

The bride's gift to the bride was a pendant, and the groom's gift to the bride was a pair of cuff links. Following the ceremony a reception was held at the home of Mrs. W. Poxon, mother of the bride. The room was decorated with cut flowers, while the bride's table was centered with a large three-tiered wedding cake.

The guests were received by Mrs. Poxon, who were an attractive couple of mid age and good looks. A delightful lunch was served the guests and Mrs. J. A. Ramsay and Mrs. Roush, poured tea for the first hour, while Mrs. Elliott and Mrs. Torrance poured tea for the second hour.

After the reception the happy young couple left for a few days' honeymoon at Banff, Lake Louise and other points. The happy couple will return to Carbon with hat to make.

Dr. and Mrs. Wright will return to see a few days at home before leaving to make their future home at Fairview Alberta.

SMITH-JAMES

A quiet and pretty wedding was solemnized in Knox Presbyterian Church, Calgary, at 2.30 p.m. Friday, June 24th, when Kate, eldest daughter of Mr. and Mrs. G.H. James, of Vernon B.C. was united in marriage with Wallace J. Smith, of Bassano.

The bride, who entered the church on the arm of her cousin, Mr. A. Campbell, was accompanied in a gown of pale blue tulle, with a veil of pink lace and gloves, and carried a bouquet of pink roses and carnations.

Miss Marion Smith, of Calgary, sister of the groom, was bridesmaid. She wore a dress of green crepe de chene with pink carnations. The groom was assisted by his brother, Wesley G. Smith, of Edmonton, Alberta. The Best Man, P. C. MacCrae, of Bassano was the officiating clergyman.

The guests at the wedding breakfast were the Rev. Mr. MacCrae, the Rev. Mr. John C. Smith, of Millet, mother of the groom, and other relatives and close friends.

The happy young couple left by motor for Jasper Park, and will be home in Bassano to all their friends after July 6th—Bassano Mail.

Wallace Smith was editor of The Carbon Chronicle during the years 1923-26, and is well known throughout the town and district and his many friends wish him a long and happy married life.

GAME REGULATIONS UNDER NEW ACT TO BE ISSUED SOON

Regulations under the new Alberta Game Act are at present being drafted and are expected to be ready about the middle of July, according to Harry Clark, Provincial Game Commissioner.

The regulations will govern fees, limits and other details. In addition the department will issue its hand book of information on the subject.

CARBON LAWN TENNIS CLUB IS VICTOR SUNDAY

Trochu Shows Good Form But Lack Practice and Experience

LOCAL TOURNAMENT

An interesting Lawn Tennis match was played at Carbon on June 26th when Trochu club visited the Carbon club. This was the first meeting between these clubs and therefore created a great deal of interest. The schedule of seven events was played and Carbon was successful in taking all seven matches. The victors played excellent tennis and ran several of the events to three sets.

The following are the results and scores:

Men's Singles—W. Poxon of Carbon defeated A. Hawker of Trochu 6-1, 6-3. W. Edwards of Carbon defeated C. Gilchrist of Trochu 4-6, 6-1.

Ladies' Singles—Miss M. Poxon of Carbon defeated Miss M. Cameron of Trochu 6-1, 2-6, 6-3.

Men's Doubles—Edwards and J. Macdonald of Carbon defeated A. Hawker and Mr. Maile of Trochu 6-3, 6-5. W. Poxon and C. Poxon of Carbon defeated C. Gilchrist and S. S. S. of Trochu 6-3, 6-1, 6-3.

Ladies' Doubles—Mrs. Wilson and Miss N. Hemmings of Carbon defeated Miss M. Cameron and L. Maile of Trochu 6-3, 6-1, 6-3.

Mixed Doubles—J. S. S. and Miss M. Poxon of Carbon defeated S. S. S. and Miss Maile of Trochu 6-3, 6-1, 6-3.

CARBON LAWN TENNIS CLUB BOYS' HANDICAP

The final of the Carbon Lawn Tennis club boys' handicap was played on June 25th and resulted in a win for Harold Edwards. This handicapped was won by the secretary of the club, W. A. Bricker. The handicap was as follows: Edwards 3-6, 6-3, 6-5. Poxon 6-3, 6-1, 6-3. W. Poxon 6-3, 6-1, 6-3. W. Poxon 6-3, 6-1, 6-3. W. Poxon 6-3, 6-1, 6-3.

First Round—H. Edwards defeated C. Poxon 6-3, 6-1, 6-3. W. Poxon defeated P. Poxon 6-3, 6-1, 6-3. J. S. S. defeated L. Maile 6-3, 6-1, 6-3. W. Poxon defeated W. Poxon 6-3, 6-1, 6-3.

Second Round—H. Edwards defeated N. Nash 2-6, 6-3, 6-5. W. Poxon defeated J. S. S. 6-3, 6-1, 6-3. W. Poxon defeated W. Poxon 6-3, 6-1, 6-3.

Semi-Final—H. Edwards defeated W. Poxon 6-3, 6-1, 6-3. W. Poxon defeated W. Poxon 6-3, 6-1, 6-3.

Final—H. Edwards defeated H. W. Poxon 6-3, 6-1, 6-3.

ALBERTA NEWS

The appeal court of Alberta has decided that Indians have unrestricted rights to hunt game for food on any unoccupied crown lands, regardless of the Alberta Game Laws. The law is valid, except that under treaty rights, they do not apply to Indians hunting for food.

Victim of a serious accident, following an attempt to board a moving freight train at Lacrosse recently Gordon Bruyas was rushed to the hospital, where it was found necessary to remove one foot completely, and the other to the knee.

The Alberta government set to hear of an appeal from a few days ago. The right away notified us to the effect that we were subject to the amendment tax—Blairmore Enterprise.

Calgary's request to Prime Minister H. B. Bennett for a high-powered radio-broadcasting station when the national Broadcasting system goes into effect, would undoubtedly be considered and possibly recommended by the Minister of the Interior. In the matter, Andrew D. MacLean, secretary to the premier informed the City of Calgary.

11 YEARS AGO

A serious accident happened on Tuesday morning when a farmer from Strathmore was killed when his tractor overturned in a culch near town.

In going to press we hear that wedding bells are ringing in Calgary in honor of one of our young couples, Miss Ethel Hay and Stanley Torrance.

The school children of Carbon and Arcadia held a most enjoyable picnic on Wednesday afternoon in the shop near Mr. McNaughton's. About 125 children were present.

The following is a list of the prize winners:

5 years and under: 1st, Harry Poxon, 2nd, Sam Poxon.

4 years, 1st, Norman Ramsay, 2nd, Irvin Mortimer.

Boys 7 and 8, 1st, Wilfred Poxon, 2nd, Cyril Poxon.

Girls 7 and 8, 1st, Margaret Owen, 2nd, Irene Nash.

Boys 9 and 10, 1st, Armand Turcotte, 2nd, Peter Turcotte.

Girls 9 and 10, 1st, Edith Brasher, 2nd, Ruth Trumley.

Boys 11 and 12, 1st, Charles Macnaught, 2nd, Vernon Poxon, 3rd, Alfred Charles.

Boys 13 and 14, 1st, Harold Edwards, 2nd, L. Maile.

Boys 15 and 16, 1st, Harold Edwards, 2nd, L. Maile.

Boys 17 and 18, 1st, Harold Edwards, 2nd, L. Maile.

Boys 19 and 20, 1st, Harold Edwards, 2nd, L. Maile.

Boys 21 and 22, 1st, Harold Edwards, 2nd, L. Maile.

Boys 23 and 24, 1st, Harold Edwards, 2nd, L. Maile.

Boys 25 and 26, 1st, Harold Edwards, 2nd, L. Maile.

Boys 27 and 28, 1st, Harold Edwards, 2nd, L. Maile.

Boys 29 and 30, 1st, Harold Edwards, 2nd, L. Maile.

Boys 31 and 32, 1st, Harold Edwards, 2nd, L. Maile.

Boys 33 and 34, 1st, Harold Edwards, 2nd, L. Maile.

Boys 35 and 36, 1st, Harold Edwards, 2nd, L. Maile.

Boys 37 and 38, 1st, Harold Edwards, 2nd, L. Maile.

Boys 39 and 40, 1st, Harold Edwards, 2nd, L. Maile.

Boys 41 and 42, 1st, Harold Edwards, 2nd, L. Maile.

Boys 43 and 44, 1st, Harold Edwards, 2nd, L. Maile.

Boys 45 and 46, 1st, Harold Edwards, 2nd, L. Maile.

Boys 47 and 48, 1st, Harold Edwards, 2nd, L. Maile.

Boys 49 and 50, 1st, Harold Edwards, 2nd, L. Maile.

Boys 51 and 52, 1st, Harold Edwards, 2nd, L. Maile.

Boys 53 and 54, 1st, Harold Edwards, 2nd, L. Maile.

Boys 55 and 56, 1st, Harold Edwards, 2nd, L. Maile.

Boys 57 and 58, 1st, Harold Edwards, 2nd, L. Maile.

Boys 59 and 60, 1st, Harold Edwards, 2nd, L. Maile.

Boys 61 and 62, 1st, Harold Edwards, 2nd, L. Maile.

Boys 63 and 64, 1st, Harold Edwards, 2nd, L. Maile.

Boys 65 and 66, 1st, Harold Edwards, 2nd, L. Maile.

Boys 67 and 68, 1st, Harold Edwards, 2nd, L. Maile.

Boys 69 and 70, 1st, Harold Edwards, 2nd, L. Maile.

Boys 71 and 72, 1st, Harold Edwards, 2nd, L. Maile.

Boys 73 and 74, 1st, Harold Edwards, 2nd, L. Maile.

Boys 75 and 76, 1st, Harold Edwards, 2nd, L. Maile.

Boys 77 and 78, 1st, Harold Edwards, 2nd, L. Maile.

Boys 79 and 80, 1st, Harold Edwards, 2nd, L. Maile.

Boys 81 and 82, 1st, Harold Edwards, 2nd, L. Maile.

Boys 83 and 84, 1st, Harold Edwards, 2nd, L. Maile.

Boys 85 and 86, 1st, Harold Edwards, 2nd, L. Maile.

Boys 87 and 88, 1st, Harold Edwards, 2nd, L. Maile.

Boys 89 and 90, 1st, Harold Edwards, 2nd, L. Maile.

Boys 91 and 92, 1st, Harold Edwards, 2nd, L. Maile.

Boys 93 and 94, 1st, Harold Edwards, 2nd, L. Maile.

Boys 95 and 96, 1st, Harold Edwards, 2nd, L. Maile.

Boys 97 and 98, 1st, Harold Edwards, 2nd, L. Maile.

Boys 99 and 100, 1st, Harold Edwards, 2nd, L. Maile.

IDEAL WEATHER CONDITION FOR GROWING GRAIN

One Farmer Reports Spring Wheat Up 26 Inches High

CUTTING BY AUG. 1st.

The first growth of ideal weather has given a most good boost to the crops of the Carbon district and reports are now coming in from various localities and advanced sections. On Saturday of last week Fred Zeller reported that his early wheat, which was now about 24 inches high, was growing rapidly, five inches this grain has grown to about thirty inches now, at this rate. The wheat in this field is in the shot blade and beginning to head out. In this case it will not be long with the continuation of this weather, before this field will be coming in head and ready. This week will mean that about cutting in the Carbon district should commence about the first of August, if all goes well.

Other farmers in the district are likewise in season, similar to that of Mr. Zeller, and continue to report as well as continue to head out and ready. This week will mean that about cutting in the Carbon district should commence about the first of August, if all goes well.

The reports are continuing optimistic in view of the fact that crops in the district are now four feet high, and are now coming in head and ready. This week will mean that about cutting in the Carbon district should commence about the first of August, if all goes well.

Surgeon Says United States Intelligence Tests For Immigrants Are In Need Of Revision

Intelligence tests now available must be revised or the methods of securing changed before they are satisfactory for testing immigrants, it appears from a report of Dr. Lawrence Kolb, senior surgeon of the U.S. Public Health Service, before the meeting of the American Association for the Study of the Feeble-minded.

The law now provides that no mental defectives shall be admitted to this country. But although psychologists have devised special tests which do not require the use of language, the scores on these tests do not give a true picture of the mental ability of the person tested, Dr. Kolb found. His conclusion is based on the results of tests given to 3,000 persons desiring to enter the United States from Europe.

Men do conspicuously better on these non-verbal, or performance tests than do women, although there is no reason to suppose that the men are more intelligent than the women. Children able to read and write do the tests as well as their illiterate parents, and, because of the difference in age attain a higher intelligence quotient which is mental age divided by actual age. Young adults do better than older adults and the difference between the illiterates and those who can read is very high.

These facts seem to indicate that ability on the tests depends to some extent at least upon the stimulating character of the environment and upon the education as well as upon innate capacity which they are supposed to measure, Dr. Kolb believes.

The average of the intelligence quotients of the illiterate women was below 50, which would place half of them in the classification psychologists call "imbecile" even lower, but this rating is misleading, Dr. Kolb points out.

The scores doubtless show very poor native intelligence, but they obviously did not mean all that they say. Fifty per cent. of them failed to be imbeciles, or even feeble-minded, by any social standards.

The results for the men were also misleading, he found. Five per cent. of the men from southern Italy received a rating which showed them to have minds developed only to the level of an 8-year-old child, yet all had been able to support themselves and live within the law. It is known that some, with this grade of intelligence, come here, save money and send back home for their relatives.

Origin Of Familiar Term

Superstition Of Early Saxons Gave Us "Mare's Nest"

Early Saxons believed in the existence of a queer monster named Mara, which crouched on the chest of sleepers (hence the term nightmare). The beast was supposed to live in a nest lined with gold. Crouching people used to look for Mara's nest before going to bed to check the treasure. From this legend, any supposed great discovery which led to nothing, has become known as Mara's, or a mare's nest.

Preferred Hail

During a political campaign a certain orator spoke to a great gathering of country people. He was impassioned, he was impressive, he was grand. The thunderous applause of the crowd told him so. He thrilled with the consciousness of his power over the minds of men. And, being in this state of mind, he stood in the midst of the assemblage, after speaking, and listened to the comments of the audience.

"What do you think of his speech?" asked one old farmer.

"Well," replied another, "I think that six hours' rain would have done more good!"

There are about 875 species of iris.

For real summery wear, a sheer batiste in grey polka-dots or sheer linen twined and tubular silks are decidedly chic and practical. Size 36 requires 3 1/2 yards of 39-inch material with 1 1/2 yards of 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (not in postage). Wrap copy carefully.

Turkish Public Baths Deprived Of Water

Citizens Of Ouzla Resent Action Of Mayor Over Taxes

Fifteen thousand citizens of Ouzla are crying for a bath.

A fight between the town government and the public bath owners over taxes led the mayor to cut off the water supply at all the bath houses. Tubs exist only in a few wealthy homes, so practically the whole population depends on the public pools for the cleanliness which the Koran imposes on every good Moslem.

The women of Ouzla are particularly loud in their protests, as bath-day is the chief social event of their lives. They make a whole day of it, carrying their lunch along and spending hours steaming themselves, reclining in the cooling rooms, eating nuts, drinking coffee and gossiping.

Use Clouds As Screen

Every cloud and every mountain-side would be converted into a motion picture screen by a projector invented by a Berlin engineer. The apparatus has a range of five miles. On low-lying clouds 250 feet above the earth, pictures 120 feet high can be flashed, while the distance of the machine from the mountain determines the size of the figures.

454

STILL ANOTHER NEW AND LOVELY DRESS THAT'S SUITED FOR TOWN, AFTERNOONS OR RESORTS

Here's one of the smartest and most becoming models Paris has sent us this season. The becoming neckline, cool and lovely, suits mink or mairon.

It is smart carried out top by its aspirator in a sheer crepe print toped by plain sheer crepe. It meets many daytime needs. It has especial appeal for the business woman.

Style No. 454 is designed for sizes 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60 and 62 inches bust.

Printed and plain crepe silk is conservatively smart.

For real summery wear, a sheer batiste in grey polka-dots or sheer linen twined and tubular silks are decidedly chic and practical.

Size 36 requires 3 1/2 yards of 39-inch material with 1 1/2 yards of 39-inch contrasting.

Price of pattern 20 cents in stamps or coin (not in postage). Wrap copy carefully.

Address: Winnipeg Newspaper Union, 172 McDermott Ave., Winnipeg

Stabilize Farm Values

Western Agriculture To Become More Profitable In The Reasonably Near Future

With the "reasonably near future" agriculture in western Canada will become more profitable on a more permanent basis than in the past and farm values will become stabilized on the basis of net production returns, said C. M. Bowman, chairman of the board, Mutual Life Insurance Company, Waterloo, before the 16th annual convention of the Dominion Mortgage and Investments Association held in London, Ontario, the other day.

Mr. Bowman reviewed the investment and mortgage business of the past year. He dealt with the various pieces of restrictive legislation in the west designed "presumably to benefit the position of the debtor, but making it increasingly difficult for the mortgagee to enforce his contract," styling this as "undoubtedly an important influence underlying the eastward movement of funds for mortgage investment."

Belgium now has only about 170,000 unemployed.

Isolation Four Centuries

To visit people in remote districts in the forests of the Nijni-Novgorod province of Russia who have been isolated from the rest of the world for 400 years an expedition left Moscow in June. The inhabitants of the districts still speak Russian as it was spoken in the sixteenth century.

Shrinkage Of Ohio Man's Fortune Shows Contraction In Values

The extent of the decline in security values brought about by slack times was never better illustrated than in the shrinkage of the estate of the late Samuel Mathur, famous Ohio philanthropist.

Mr. Mathur, who had extensive holdings in steel companies and in Great Lakes steamship lines, held an estate that was worth upwards of \$4,000,000 in the summer of 1929. Last year he died; and when an inventory of his estate was filed in the Ohio probate court the other day, it was found that \$4,000,000 value had come down to about \$650,000.

Could there be a more graphic example of the way in which values have contracted in the last two and one-half years?

Shrinkage Of Ohio Man's Fortune Shows Contraction In Values

Three European Nations Have Reciprocally Agreed Not To Impose Any New Tariffs

Newest Northern Ontario Seaport

Moosonee, On James Bay, Plans For Settlement Of 5,000 People

The day before yesterday, figuratively speaking, the Hudson Bay region was Ultima Thule as far as the concerned vacation traveler. Now a line of steel in Manitoba follows the Nelson river for many miles then turns north to the port of Churchill. An even more recent penetration is the extension of the Temiskaming and Northern Ontario Railway through northern Ontario to the old fur-traders' rendezvous at Moose Factory. Northwards from Cochrane the railway line follows the AMBU river to the Moose and then turns eastward to James Bay. Here will be located the newest seaport of northern Ontario, Moosonee, where plans for a settlement of 5,000 people are under way.

A survey party is now laying out the townsite in accordance with the accepted plans which provide for schools, hotels, public buildings, hospital and sports field. Water for Moosonee will be supplied from Stone Creek. The 200 acre town will be on the northern side of the Moose River, and will stretch for two and a half miles along the shore. The townsite will serve as a base for development along the coast of Hudson Bay such as fishing operations, the fur-trade and the pulp industry.

For years canoeists journeying down the Atchibi, Mistissini or Mattagami rivers to the Moose River and thence to the Bay, were faced with the prospect of an arduous return trip on one of these rivers. Now the back-breaking tracking and poiling of canoes up the rapids, and the labour of shifting damaged bags and outfit over the portages has been rendered unnecessary. No longer need the pleasures of these cruises be marred by the thought of a laborious return—the "Iron Horse" has solved the difficulty.

The extension of this Ontario government owned railway has opened up some very attractive new fishing waters. Many of the smaller streams in this new section abound with brook trout and even in some of the larger streams even sturgeon may be hooked.

Canadian Institute

Establishment Of A Permanent Office To Be Located In Toronto

Appointment of a permanent secretary and establishment of a permanent office, to be located in Toronto, was announced by the executive committee of the Canadian Institute of International Affairs, through Hon. N. W. Rowell, president of the Institute.

Recent files of Toronto, its appointment as permanent secretary. Mr. Reid is a graduate of Toronto University (Trinity College) and a Rhodes scholar, taking his work at Christ Church, Oxford. Study of Imperial and International Affairs is the object of the Institute.

Branches are now located in Halifax, Montreal, Ottawa, Toronto, Winnipeg, Regina, Edmonton and Vancouver.

J. W. Duff, of Winnipeg is a vice-president.

Strange Bird Bath

Imprint Of Animals' Feet Found Feathered Tribe At Ottawa

Ottawa may claim to have the most unique bird bath in Canada. One of the large dinosaur footprints found at Pelee Island, Ontario, for the National Museum of Canada, has been duplicated in cement. It has a length of more than two feet and a depth of five or six inches, and has been placed in the museum grounds.

The birds of the capital now may enjoy the privilege of a morning dip in the unique bath tub moulded from the footprint of a dinosaur made in the mud of a shallow western lake long before the Rocky Mountains arose above the plains.

This spring the prairie provinces had 13,398,200 acres under summer fallow, 592,000 acres of new reseeded and 6,768,000 of fall plowing—a total acreage prepared in the previous year of 19,668,200.

Nearly one-third of the adult male population of France today consists of bachelors.

Construction of public works in France is increasing.

Representatives Of The governments Of Holland, Belgium and Luxembourg have reciprocally agreed not to impose any new tariffs and to proceed by annual reductions of 10 per cent. until a defined tariff level is reached.

They further undertake not to impose any new tariffs and to proceed by annual reductions of 10 per cent. until a defined tariff level is reached. They further undertake not to impose any new tariffs and to proceed by annual reductions of 10 per cent. until a defined tariff level is reached.

It is preceded by a preamble in which the contracting states declare they are "persuaded that progressive realization of greater freedom of trade is one of the essential conditions for world prosperity." They further declare they "are desirous of undertaking in this sense a convention in which all states will be entitled to participate, thus contributing to the re-establishment of the general economic situation."

The necessity of some action towards restoring the stability of the international situation, and of increasing international credit with removal or amelioration of the trade restrictive measures that have appeared in late years, was urged in a resolution adopted by the three countries and Denmark, Sweden, and Norway, of which the agreement is the outcome.

International Friendship

Dedication Of Water-Glacier Peace Park

Another link has been added to the chain of international friendship between Canada and United States.

In the midst of border mountains between the two lakes, representatives of both countries extended international greetings as they dedicated the Water-Glacier Peace Park to 117 years of goodwill between the two nations.

Mr. Charles Mander, Mayor of Wollastonville, England, director and past president of Rotary in Great Britain, presided at the colorful ceremony attended by representatives of political and clerical life and hundreds of Rotary international members who sponsored the project.

Messages from Prime Minister Bennett and President Hoover were read by Lieutenant-Governor Walsh of Alberta and Governor John E. Erickson of Montana. Premier J. R. Brownlee headed a group of Alberta representatives, including Senator W. A. Buchanan.

Bands and church choirs from Montana attended.

Pedestrian's Rights

Organization Contemplated For The Protection Of Those Who Walk

"The Pedestrian's Rights Association" is the latest organization contemplated by the pedestrianists on highways and in the public streets. Letters of incorporation have been applied for by a firm of Ottawa business men.

Protection of pedestrians from traffic dangers, promotion of publicity and instruction among the general public on such matters, the improvement of existing laws and their enforcement, and the education of citizens in reporting infractions of traffic laws are among the objects of the proposed association.

Newest In Fountains

An electric drinking fountain has been designed which only operates when the drinker leans over the fountain. The head intercepts a beam of light shining on an electric eye. This automatically starts a stream of cold water flowing.

More than 18,000 people paid to hear a band concert in London recently.

DEVELOPMENT OF EMPIRE TRADE WOULD AID WEST

Baikatoon, Sask.—Envisaging the coming imperial-conference as a rainbow in the clouds at a time of disheartenment and despair, Dr. John W. Dufao, dean of Canadian editors, addressed convention delegates of the Union of Saskatchewan Municipalities, at "Canada and Foreign Markets," an address which looked to facilitation of empire trade and modification of obstacles to international commerce.

Dr. Dufao, editor of the Winnipeg Free Press, termed by introductory speakers, including Premier J. T. M. Anderson, as "an eminent figure in empire journalism," delivered the main address at a luncheon tendered to the convention delegates by the Baikatoon Board of Trade.

Drawing attention to the substantial improvement in conditions that would follow any imperial conference and world trade occasioned by the conference at Ottawa next month, the speaker said that would be pointed to the benefits that would accrue to the west.

"There is no place in the world more likely to profit than the three western provinces," he declared, "no cities will feel the impulse quicker than the cities of the west."

While he advised his audience to follow the conference deliberations with interest and hope, he said that the speaker should not be lulled by the hope that the conference would be a success.

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

Advertise the West

Formal Opening Ceremonies At Port Churchill Are Approved

Winnipeg, Man.—Formal opening of the Port of Churchill during the present season would meet with the full approval of the Manitoba Government, two cabinet ministers stated, they added, the hope the ceremony would be one which would advertise the prairie's direct outlet to the sea to the world, and viewed with favor the suggestion that overseas delegates to the Imperial Economic Conference should attend.

The recent statement of Hon. R. J. Manion, Federal Minister of Railways and Canals, that he was considering plans for formal opening ceremonies in connection with both Churchill and the Welland Canal led Hon. W. J. Major, Attorney-General, and Hon. J. B. McMillan, Minister of Natural Resources and Industry, to hope for early action.

"There is no place in the world more likely to profit than the three western provinces," he declared, "no cities will feel the impulse quicker than the cities of the west."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

BRITAIN FAVORS U. S. PROPOSAL FOR ARMS FOR ARMS

Geneva, Switzerland.—Proposal of President Herbert Hoover for a one-third reduction in world armaments, which provided instant opposition from France and varying degrees of approval from other countries when submitted by the United States delegation to the disarmament conference, was welcomed for its "breadth of view" and at the same time supplemented by additional suggestions in a statement made on behalf of Great Britain by Sir John Simon, foreign secretary.

The United States proposal to cut one-third of naval, military and air armament expenditures with a resulting saving to the world estimate of \$10,000,000,000 to \$15,000,000,000 in the next 10 years was regarded, despite absence of official confirmation, as a compromise to respect the war debts question. This view appeared to many observers despite the stress placed by the United States government on the statement that its representatives here had not discussed war debts and reparations.

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

"The speaker should not be lulled by the hope that the conference would be a success," he said, "the speaker should not be lulled by the hope that the conference would be a success."

WELCOMES DISARMAMENT

British Foreign Secretary is Strongly in Favor of President Hoover's Proposal, and would even go further.

SIR JOHN SIMON
British Foreign Secretary is strongly in favor of President Hoover's proposal, and would even go further.

Destructive Wind Storm

Tract of Fertile Land in Southern Saskatchewan Suffers From Gale

Milestone, Sask.—Reminiscence of the Regina cyclone of June 30, 1912, the district south of Milestone was visited by a heavy wind storm accompanied by rain and hail which did untold damage to buildings and crops lying in its path. The gale came up quickly, and though it lasted for little more than half an hour it spread destruction over a tract of fertile land approximately three miles wide and 15 miles long lying about four miles south of town.

There were no deaths resulting from the storm, but Robert Kemmick, Jr., had a terrifying experience and a very narrow escape when the house in which he had been residing was lifted off its foundation and smashed. The killing wind, Mr. Kemmick was alone at the time, his wife being away visiting relatives, and he jumped from a height of about 15 feet to the ground. His only injury was a sprained ankle.

It was the worst storm ever experienced in this locality. The worst hail damage was apparently done to the farms of H. V. Underwood, Mrs. A. J. Bradley, Ross Cunningham and Wm. McCartney.

Epidemic in China

Cholera Reported to Be Raging in Southern Provinces

Hong Kong, China.—Cholera is raging throughout South China. Nearly 200 new cases are being reported each day, and 70 per cent. of the cases are proving fatal.

There was no case at Hong Kong, but Canton was reported especially hard hit.

A report from Wuchow said Chinese was arrested in possession of white pills which he said certain foreigners paid him to throw into wells.

Trade Agreement Pending
Berlin, Germany.—An agreement between Germany and Canada to negotiate a commercial treaty within six months was announced by the German Government. Higher tariff duties will not be imposed in the meantime, the contracting countries were said to have agreed.

Lower Own Record
Chebourg, France.—The lightweight "Empress of Britain" lowered the record of the Atlantic crossing again by an hour from her own record, the arrival at Chebourg in four days, seven hours and 58 minutes from Father Point, Quebec.

Veterans Ask Probe

Chin Alleged Fraud Costs Shadow On Administration of Pension Act

Ottawa, Ont.—Declaring publicly given to allegations of fraud and misrepresentation in connection with war pensions casts a serious shadow on the administration of the pension act, the Associated Veterans of Canada have issued a statement calling for a complete investigation of the charges.

The statement is signed, representatives of the Army and Navy Veterans, the Canadian Legion, including the Tubercular Veterans section, the Great War and the Sir Arthur Penikese Association, the Canadian Pensioners' Association of the son club of Blind Soldiers and Soldiers.

Ottawa, Ont.—No "general investigation" into the war pension system and into frauds that have been perpetrated by reason of misrepresentation of the part of a number of recipients is contemplated, Colonel G. Thompson, chairman of the Board of Pensions Commissioners, said, that frauds existed were known, and these were being checked daily.

Cowboys Hold Bronchos

Until Toronto Rodeo Authorities Come Across With Wages

Toronto, Ont.—Never-again spirit of the Canadian west has manifested itself here in unusual fashion. An even score of cowboys from the southern Saskatchewan and Alberta are holding 60 bronchos on the outskirts of Toronto. They rode off with the animals when they did not get paid for their week's work at a local stampede and rodeo. And they have declared their intention of keeping the bronchos until the rodeo authorities come across with wages.

Seven-foot tall Harry Hourie, of the Wood Mounts, relative of the man who captured Louis Riel, instigator of the Northwest rebellion, was in the van as the 20 rode off with the 65 bronchos.

DE VALERA PLAN DOES NOT MEET WITH APPROVAL

London, England.—Suggestions of Premier De Valera, of the Irish Free State, that the difference between Great Britain and the Free State over the payment of land annuities should be referred to an international tribunal is unacceptable to the British Government, it was understood here following a meeting of the cabinet.

Considering its reply to De Valera's last note, in which the suggestion was made, the cabinet was believed to be in the opinion that only an Empire body could be permitted to arbitrate matters affecting the relations between the governments in London and Dublin.

At the same time the ministers were not inclined to consent as vigorously a second point in the De Valera communication, namely, that if and when the land annuities dispute was referred to arbitration, other annual payments by the Free State to Great Britain should also be considered. It is, therefore, regarded as probable here that if the Irish authorities were to agree to the principle of arbitration before an Empire tribunal, Great Britain would consent to having the scope of the hearing extended beyond the matter of land annuities.

CROP REPORTS FOR WEST ARE ENCOURAGING

Montreal, Que.—The practically every important agricultural region in the Dominion the crops have been making excellent growth, although east of the Great Lakes rain will be needed in the near future if favorable prospects are to continue," states the current telegraphic crop report of the Bank of Montreal. "Ideal weather throughout the prairie provinces has brought the grain along rapidly and wheat is now advancing into the shot blade stage in healthy condition," the report continues. Moisture conditions generally are satisfactory at present. In Ontario prospects for better than average crops have received a set-back on account of dry weather, though conditions are still substantially satisfactory. In the Maritime provinces growth has been somewhat slow, wheat, however, is making a good start. In the British Columbia growing conditions have been excellent and prospects are good. Details follow:

Alberta, Northwestern Area.—Recent higher temperatures have prevented growth of crops. Wheat is 10 to 12 inches along with a heavy stand and is about 15 per cent. in shot blade. Alberta southeastern area.—Wheat with intermittent rains is producing rapid growth of all crops. Some damage from cutworms is reported. Pasture is plentiful. Alfalfa is making a good start, some with about 10 per cent. in shot blade. Moisture is sufficient.

Saskatchewan, Northern Area.—Wheat is showing satisfactory growth, with a healthy appearance. The average height is 10 inches. Clovers are somewhat patchy. There is substantially no frost at present.

Saskatchewan, Southern Area.—Wheat is showing satisfactory growth, with a healthy appearance. The average height is 10 inches. Clovers are somewhat patchy. There is substantially no frost at present.

Manitoba.—Wheat is showing under favorable conditions and is largely in shot blade. Moisture is satisfactory. Cutworms and grasshoppers have been reported, but some small preventive measures are being taken to control the threat.

Pull wheat is in head and is exceptionally promising, but some small preventive measures are being taken to control the threat. British Columbia.—Grain is showing satisfactory growth, with a healthy appearance. The average height is 10 inches. Clovers are somewhat patchy. There is substantially no frost at present.

Manitoba.—Wheat is showing under favorable conditions and is largely in shot blade. Moisture is satisfactory. Cutworms and grasshoppers have been reported, but some small preventive measures are being taken to control the threat.

Manitoba.—Wheat is showing under favorable conditions and is largely in shot blade. Moisture is satisfactory. Cutworms and grasshoppers have been reported, but some small preventive measures are being taken to control the threat.

Pull wheat is in head and is exceptionally promising, but some small preventive measures are being taken to control the threat. British Columbia.—Grain is showing satisfactory growth, with a healthy appearance. The average height is 10 inches. Clovers are somewhat patchy. There is substantially no frost at present.

Manitoba.—Wheat is showing under favorable conditions and is largely in shot blade. Moisture is satisfactory. Cutworms and grasshoppers have been reported, but some small preventive measures are being taken to control the threat.

Famine in China

Cannibals Reported to Be in Desolated Areas

Vancouver, B.C.—Desolation and disaster in the famine area of China has attracted the members of the Canadian Club by Very Rev. Hewlett Johnson, dean of Canterbury Cathedral, Canterbury, Kent, England.

Dean Johnson, during three months studying conditions in China.

Cannibalism was rife in areas desolated by famine, he declared. Conditions were so bad they were not beyond imagination. "One missionary told me he had actually witnessed the preparation of human flesh for food."

Many desperate people resorted to cannibalism, he said, who had gone to the point of eating their own children for food and for no other reason was to fight. Relief workers were under a severe handicap, due to poor transportation facilities, he concluded.

New 'Mountain' Posts Being Established

One At Fort Norman Will Be Opened At Once

Calgary, Alberta.—Royal Canadian Mounted Police will be stationed at Fort Norman in the Great Bear Lake area of Canada's north, according to an announcement made by Major-General J. H. Macbride, C.B., C.M.G., D.S.O., commissioner of the R.C.M.P.

An officer may be stationed also at Egan, near the centre of the mining fields.

The Fort Norman detachment, he said, would control the activities at Great Bear Lake, scene of recent railway-bearing ore finds, which drew hundreds of fortune hunters into the field, according to F. Abbey, Alberta Inspector.

"This diversion is the result of the lumber trade mission which Canada sent over to Australia some years ago," said Mr. Abbey. "The gentlemen who were members of the mission knew of the gold in the Yukon. They visited us and told us the Canadian point of view. They attempted to sell nothing at all. Yet I told them that at least as early as the year of Victoria is concerned, they were very successful. We don't buy lumber from the United States any more."

Deferred Elections
Report Manitoba Conservatives Will Not Contest Northern Ridings

Winnipeg, Man.—Conservatives of Manitoba will not contest the deferred election seats at The Pas and Rupert's Land, it was made known at party headquarters here. Nomination day in these two northern ridings is July 4 and polling day July 14.

There will probably be an acclamation in Rupert's Land but in The Pas the Independent Labor Party will force Premier John Bracken to an election.

Proposed Change in System
Edmonton, Alberta.—Alberta province changing the present electoral district system to one of "enlarged municipal areas," according to a plan announced by Premier John Brownlee. Increased efficiency in administration and a saving of more than a million dollars will result if the plan is adopted, it is believed.

Credit Men Meet
Saskatoon, Sask.—J. A. Acheson, Executive-William J. T. M. Anderson, was elected president of the Canadian Credit Men's Trust Association at their annual meeting here. J. F. Sullivan, Quebec, Ontario, was named vice-president. H. Detton of Winnipeg, being re-elected general manager.

Proposed

Freak Insurance Risks

Applications For Protection Cover Great Variety Of Things

The news from Paris that Kubelik, the famous violinist, has cancelled the \$120,000 insurance policy on his hands in favor of a much larger (though unnamed) policy is a reminder that there are practically no limits to the risks against which insurance may be effected. The only proviso that to you must have an "insurable interest." That is to say, you may not insure against any eventuality which will not involve you in actual loss.

Shoppers near St. Paul's Cathedral were able to take out special insurance policies when there was said to be a danger of the cathedral falling down. The life of the late Tsar was insured by business men with interests in Russia for a sum estimated at well over a million pounds.

You may insure against terrors against breach of promise, against your fancy in the big race foundering before it reaches the post, against wet weather spoiling your holiday, or against your daughter's eloping.

A French insurance company is even willing to insure women against the possibility of failure to secure husbands. It must, one would imagine, be rather a delicate task to decide what the premium should be in some of these cases.

Cecile Sorel, of the Comedie Francaise, once took out a policy covering the risk of her hat being blown overboard on an Atlantic voyage. The hat was studded with diamonds and emeralds.

Truly the variety of possible insurance policies is immense. Here are some other instances of unusual insurance.

Miss Mable Poulton, the English film star: Eyes insured for \$150,000. Miss Pearl White, the film actress: Dimples for \$50,000.

M. Padewski, the pianist: Hands for \$60,000.

Miss Vera Mosconi, the dancer: Eardrums for \$50,000. (She cannot dance unless she can hear the music).

Polaire, "The Homecoming Woman on the Stage": Policy for several hundred thousand francs in case her ugliness is marred.

Miss Fay Marble, the American actress: Soles insured for \$25,000.

Ben Turpin, the cinema actor, will get \$100,000 from an insurance company if his cross-eyes become straight, and Alberta Vaughn's producer in Hollywood will claim \$25,000 if she eats too much candy and becomes rotund.

Rats Are Blamed

Scientist Claims Rodents Carry Typhus Germs

Announcement of the discovery that rats carry typhus was made by Jos. E. Ramsdell, director of the conference board of the United States National Institute of Health.

Ramsdell said three physicians of the National Institute of Health at Washington, D.C., discovered that the fever formerly thought to have been carried by lice, is spread by rats.

"Eliminate rats and typhus will disappear," Ramsdell declared in an address in connection with Union College commencement exercises.

First Automobile Builder
Alexander Winton, Sr., pioneer automobile manufacturer, died recently in Cleveland. Mr. Winton was known as the first man who ever manufactured an automobile to sell commercially. He began the manufacture of motor cars in 1884 after establishing the Winton Bicycle Company.

Alberta's production of butter in 1931 was 22,997,922 lbs. This exceeds all previous records by over 600,000 lbs.

Oysters still rank as luxuries in Europe.

"I saw you kiss my wife! What have you to say about it?"
"If I catch you spring again there will be trouble,"—Kasper, Stockholm.

NOTES ON GARDENING

Celery Is Easily Grown, Contrary To General Opinion

Contrary to somewhat general opinion, celery is not a difficult plant to grow, and a large quantity can be produced in a very small space, thus putting this vegetable in the city garden class. The first rows can be put out any time now, with the main planting about the first week in July. Plants are produced from seed sown in the hot bed, or they may be purchased from almost any corner store at this time. The ideal soil is a very rich, well-drained muck, though practically any combination will do as long as we fertilize well, have good drainage and apply lots of water. Give the plants from six to eight inches each way and rows may be as close together as we like after making allowance for cultivation. Keep the ground thoroughly worked up all the time. Light applications of nitrate of soda just after the plants are set out and again in two or three weeks will help growth along wonderfully. The simplest way to bleach celery in the fall is to place boards down up against the plants on both sides of the row and bank with earth. In the fall, plants may be lifted without bleaching and stored, lightly placed together in a bushel basket in some dark place, and they will be white and tender in a week or ten days.

Roses require fairly deep cultivation and heavy fertilizing up until the first of July in order to push growth and produce flowers. After this time, however, it is advisable to slow down so that the plants may get hardened before the cold weather sets in. To aid in this process, which takes two or three months, it is a good plan to plant a few low-growing plants, such as Pansies, Calceolarias, Violas, Dwarf Nasturtiums among the roses, which will brighten up the bed and benefit the bushes by absorbing the moisture. At this time a good quick-acting fertilizer is advised. After July, however, a slower fertilizer, such as liquid manure, or bone meal should be used. Too often the average flower gardener is disgraced by odd shaped stalks, bushes and vines used to support taller flowers and shrubs. Much trouble can be avoided by giving things plenty of room so that main stems are stocky and side growth develops, but certain tall plants such as Delphinium, Phlox, Cosmos and Dahlias require some support even when grown under the best conditions, otherwise they will fall over or become entangled. When a plant by its stems or heavy rain, if all stakes used are stained a neutral green or brown they will blend with the background, and will be practically hidden in a few weeks after placing. As a matter of fact, we should try to make our flowers conspicuous, not out of place.

For bushy plants like the Penny or Delphinium the writer has found a simple galvanized wire circular support suitable for the heavy, good looking wire. Cut in pieces of from two to four feet in length, depending on the height required. Put a small hook about an inch in diameter at one end, then bend in a half circle with a foot or so left over which should be turned straight down. This will give you a half circle with support. Do the same with another piece of wire only making a hook at the opposite direction, and then fasten both pieces loosely together by putting supporting straps through the loops, thus making a complete circle with two supporting pieces at opposite sides. After a trial or two, the manufacture of these supports will be very simple. Size of circle and length of supporting pieces will, of course, depend on the size of plant in view. These supports should be placed while growth is still short so that the plant will develop in and around the wire, thus hiding same and getting maximum support. Climbing roses should be attached to a light wooden trellis and preferably kept a foot or more away from stone or brick walls so that foliage and bloom will not be injured by reflected heat. An old tennis net, brush or strings make best support for sweet peas. As a rule, poultry netting should be avoided on account of the danger of cutting foliage and stems during a wind.

Great Radio Fans

Reports presented to Parliament show British radio receiving licenses total more than 4,350,000, an increase of nearly 1,000,000 in the past year. Net revenue from sale of the licenses increased £200,000 (about \$735,000).

3,500,000 tons, supplied by the Dominion Government, were planted by farmers in Western Canada this spring.

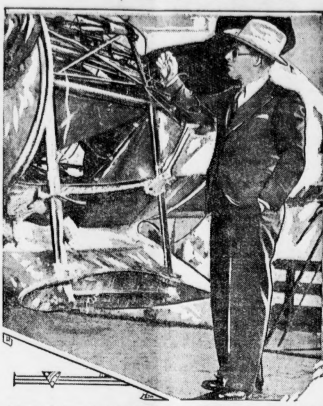

Children have keener taste-sense than adults.

Dundalk, Irish Free State, has a drive against public dance halls.

She Was a Great Little Boat

Recovered from the injuries he sustained when his plane crashed at North Quabbin, Mass., Captain Frank Hawk, famous speed ace, is shown after his release from hospital, as he inspected the wreckage of his celebrated mystery plane at East Boston Airport. Capt. Hawk was more concerned with damage done to his famous craft than he was with his own severe injuries. He will resume his flying career in a few weeks.

Visitors Allowed To See Beautiful Gardens

Number In England Open To Public

By courtesy of their owners a large number of beautiful gardens in England and Wales are open to the public at fixed dates from March to October each year, at a small charge, for the benefit of the Queen's Institute of District Nursing. By permission of the King the Royal Gardens at Sandringham are opened from 11 a.m. to 4.30 p.m., every Wednesday and Thursday from May 4, during the absence of the Court. The charge for admission is 6d. (12 cents). Her Royal Highness the Princess Royal and the Earl of Harewood are allowing the gardens at Harewood House to be open Wednesdays from 11 a.m. to 5 p.m. Admission is 1s. (24 cents). The State Rooms will also be shown during certain hours of the day. Visitors to England and Wales will find in The Times each Saturday morning a complete list of gardens which will be open during the ensuing week. It is also possible for visitors who are intending to pass some time in the country to obtain from Lady Georgiana Mure, Queen's Institute of District Nursing, 58 Victoria Street, London, S. W. 1, England, a general list for the year with dates, names of the gardens, and their owners, and the county in which they are situated. Some of the owners also offer tea, and in certain cases the houses, which are often of great historical interest, are open to visitors.

Parish Has Good Record
A committee appointed by the Parish council of Mortimer, Berkshire, England, to examine the deeds and records of the parish has reported that no document has been lost during the past 300 years.

2,000,000 bushels of grain will be exported this year through Churchill, Manitoba's new ocean port on Hudson Bay.

Japan oil imports are growing.

No Use Bothering
The United States is willing to sit in a world economic conference providing war debts and reparations are not discussed. Some Portia might point out that you can't deal with the fish without spilling some blood.

Australia will enter a large number of exhibits at the World Grain Show, to be held at Regina, Sask., next year.

Apologized For His Age

George Bernard Shaw Says Aim Of Old Men Is To Perpetuate Tradition

Bernard Shaw, addressing a crowded meeting of undergraduates at the Oxford Club, Oxford, said: "I must first apologize for my age. It is a discouraging thing for a young man to come to a place like Oxford, where there is immediately confronted by old men presuming on their age and deficiencies to assume the mastery of the situation. 'I myself should have no business here, as I am 76. If it were not that I have no advantage over you young men, this would be the advantage of experience.'"

"I am not coming the experience stunt on you tonight. Under capitalist society a man's experience is likely to be a thing he is the worse for: it is sure to have been a merely and intimidating one. 'The whole aim of old men is to perpetuate tradition, and it is largely tradition that has landed this country in the position it is in today.'"

"You may disregard my experience in every way, except one. I have been associated with young revolutionaries."

"My advantage, however, is that I have seen revolutionists in the past, died, and then old men. Among my old revolutionary friends is Mr. Ramsay MacDonald. 'I myself should have no business here, as I am 76. If it were not that I have no advantage over you young men, this would be the advantage of experience.'"

"A certain proportion of you will be living in the year 1980, but many of you will not be revolutionists in 1940."

The Cowboy's Waterloo

Mechanical Horse So Wild Riders Are Occasionally Thrown

The cowpuncher's Waterloo, a mechanical horse, upon which, its own guarantees, no rider can stay long without becoming a laughing stock. Today to prove a nemesis for riders of the Back Hills this summer.

M. Franden, Quinn, South Dakota, built the horse. It moved about the corral tossing riders in exact duplication of the movements of the wildest horse. The body of the horse, formed from an old barrel, is mounted on the rear wheels of an old automobile chassis alarmingly off centre.

The jump supplied by the centre wheels is intended by "play" in the joints and a mechanical sidestep that can be carried from side to side. A head and neck give the rider something to grasp at, but eventually he is thrown. The mechanical horse is ridden by a saddle.

Franden plans to take the horse to the tri-state roundup at Belle Fourche.

Nature's Use Of Water

Thirty-To Sixty Tons Of Water Needed To Produce Bushel Of Wheat

Probably the most important single factor in plant life is the use of the marvelous of this element as the principal medium in the growth development and transportation of consistent chemical elements from the soil and from the air for transformation into plant structure, and in this work a lot of water is used. Seven years' study carried out by experts of the Dominion Experimental Farms at Swift Current Station show, for instance, that in the production of wheat from 1,000 to 1,574 pounds of water have actually been used in the production of one pound of grain. To put it another way, for each bushel of grain produced 30 to 94.5 tons or 160 to 207 barrels of water were used. There was also found that one inch of rainfall over an acre of land is equivalent to 113 tons of water.

Valued The Hearing

The accused was ushered into the dock. The Court was silent, and presently the judge turned to him. "Prisoner at the bar," he commenced, "how do you plead? Guilty or not guilty?"

The prisoner who appeared surprisingly, at his ease, shrugged his shoulders.

"Well, if it's all the same to you, your honor, I plead guilty and waives the hearing," he replied. The judge was taken aback.

"Waives the hearing," he echoed vacantly. "Whatever do you mean?" The man in the dock proceeded to explain.

"I means I don't want to hear anything more about it," he replied.

The average woman takes the cork out of a bottle by pushing it in.

A Deplorable Situation

Drop In Price Of Farm Produce Is Manifestly Unfair

"It is scandalous that today the farmer's wife has to make four or five pounds of butter to get the price of one pound a few years ago, that four or more dozen eggs must be gathered to realize a mere quarter. That other kinds of produce has diminished proportionately in value, while the actual value to human life remains unchanged. The butter has the same food value, the hen lays her eggs undiscouraged, but meantime the value of the egg has fallen. The eggs, of interest on the bank loan is intact, though it entails four times the amount of production." These were some of the sentiments expressed by Mrs. F. M. Cameron, president of the Federated Women's Institutes of Canada, in her address to the evening session of the Homemakers' Convention held recently at Saskatoon.

Tracking Sea Currents

British Meteorological Office Collects 'Ing Data By Unique Method

After having floated 2,000 miles in five days at sea a boat was recently picked up at North Queensferry. It had been dropped overboard on October 7, 1927, by a British vessel while on a coast-guard patrol of the Pacific Ocean, 1,000 miles north of the Fiji Islands. In it was a message asking for help, and it was returned to the Meteorological Office of the British Air Ministry, which having 494 ships sailing the seven seas drop similar bottles every day in a plan of securing data to be used in tracking sea currents.

Where Wind Always Blows

Port Elizabeth, South Africa, Never Has Calm Day

Port Elizabeth, South Africa, is making a serious claim to be called the most windy place in the world. According to the tables compiled from records of the instruments at the Algoa Bay lighthouse there was wind from one direction or another almost every day last year. The lowest velocity was nine miles an hour, and the highest 83 miles an hour. On the great majority of days the maximum velocity was between 35 and 40 miles an hour and the average daily wind velocity through the year was 33 miles an hour.

Town Builder Honored

New York Gives Degree To Man Who Rebuilt Halifax

Thomas Adams, native of Edinburgh and distinguished on both sides of the Atlantic as a master town builder, has received the Honorary Degree of Doctor of Engineering from New York University.

Mr. Adams is well-known in Canada, where from 1914 to 1921 he travelled widely as an adviser on town planning possibilities under the Commission on Conservation of the Canadas. During this period he prepared the plan for the rebuilding of Halifax following the great explosion of 1917.

Just Like Lightning

A man was praising his wife as all men ought to do on proper occasions. Man—"She's a womanly woman as ever was, but she can hammer nails like lightning."

Listener—"That's remarkable." Man—"Yes, sir, you know lightning never strikes twice in the same place."

A new cold storage plant, to permit improved handling of British Columbia fruit, is being built at Kaleden, B.C.

Western Canada produced 10,635, 175 lbs. of honey last year, 7,367,375 lbs. of it was produced in Manitoba.

A new hotel will be erected this summer at St. Andrew's Locks, near Winnipeg.

Slight earthquakes have been shaking Scotland.

"No. We go back to Staple tomorrow."

"The other fellow's face fell."

"But how unfortunate! I shall then see nothing of my dear Miss Peters."

"She seemed so distressed that Lady Anne's kind heart melted within her, albeit it accorded ill with her plans to leave the number of her party."

"We are going on to the theatre," she said importantly. "If you have no other engagement, why not come with us? The play will be of some interest."

Madame de Varigny professed herself enchanted. Curiously enough, she seemed to have no particular wish to draw Jean into anything in the nature of a private talk, but appeared quite content to take part in the general conversation, while her eyes rested speculatively now upon Jean, now upon Tormain, as though they afforded her an abstract interest of some kind.

Even at the theatre, where from her corner seat she was able to regulate the other occupants of the box, she seemed almost as much interested in the play that was being performed on the stage. Once, as Tormain leaned forward and made some comment to Jean, their two eyes met, and she saw that he was looking at her with a certain understanding of some small joke or other, the quiet watcher smiled contentedly, as though the little hyacinth blossoms were growing in the garden.

"With the fall of the curtain at the end of the first act, she turned to Lady Anne, politely enquiring as to the play."

"But it is a charming play," she said. "It is no wonder the house is so full."

Her glance strayed carelessly over the body of the auditorium, then was suddenly caught and held. A minute later she was looking at Tormain.

"I think there is someone in the stalls trying to attract your attention," she observed quietly.

Even as she spoke, Nick, to become aware of the same fact.

"Hullo!" he exclaimed. "There's Geoffrey Barker down below. I didn't know he was in town."

Madame de Varigny found the effect upon her companions of this abrupt announcement distinctly interesting. It was as though a thrill of disconcerting consciousness had passed through the other occupants of the box. Jean flushed angrily and uncomfortably, and the dark, keen eyes that were watching from behind the folds of dusky lace, each one almost imperceptible exchange of expression fit across the faces of both Madame and Tormain. In neither case was the change altogether indicative of pleasure. Then, following quickly upon a bow of mutual recognition, the two ladies rose and left the theatre.

"To be continued."

Queen Mary Model Housewife.

Is Wise Shopper and Keeps Her Accounts Accurately.

Queen Mary is a model housewife. She is a wise shopper and a careful accountant. She knows just what she needs and just what she can afford.

The authority for these compliments is not King George, but Sir Ernest Cassel, the man who has just retired as treasurer to the Queen after 13 years of office.

"I have paid all Queen's private bills since my appointment," Sir Ernest told an interviewer, and I have been on hundreds of shopping expeditions with her. I have always been amazed by her grasp of current prices and the discrimination she showed in buying the right article. I never found a flaw in her bills."

A Three-In-One City

Shanghai, China's Largest City, Has Three Separate Governments

Shanghai, the largest city in China, is ruled by three different governments. The International Settlement, and the French Concession, each separately have their own laws and regulations.

The third government is the British Concession, which is further subdivided into three parts: the French Concession, the International Settlement, and the French Concession, each separately have their own laws and regulations.

Shanghai was one of the first Chinese cities to be opened to Western trade, and it has since become a great port of call for ships from all over the world.

There are about 100,000 Germans in the world. Only about 60,000 live in Germany.

Record For Scotland

No death sentence was passed in the Scotch courts during 1931. It was the first time since 1841 that no one was executed.

There are about 100,000 Germans in the world. Only about 60,000 live in Germany.

TOO FAT AT 22

Lost 19 lbs.—And Backache

"I was 22 years of age, and I weighed 145 lbs. I was a very fat girl. When I didn't care about anything, I was told to go to bed. I was told to go to bed. I was told to go to bed."

The condition which caused this came to rest on weight was also the cause of her backache and headaches. The whole trouble was due to the internal organs failing to expel from the body, regularly and completely, the waste products of digestion.

The six acts of Kruschen acted as a tonic to the system, and the function properly to throw off each day the waste and poisons that cumber the system. Then, little by little, that ugly fat—slowly, surely—disappeared. The backache and headaches, too, were cured. You feel wonderfully healthy, youthful and energetic—more so than ever before in your life.

A Novel Heating System

Electric Panels In Roof Radiate Warmth Like Sun

At two new Liverpool churches one of Andrew's ideas and one of Morris Green are to have an entirely novel form of heating. They will be kept warm by electric rays from the roof.

The electric rays from the roof will be directed straight down by dual electric rays at low temperatures. The people worshipping in these churches will feel as if the sun is shining down on them. These are the first churches in the world to have this kind of heating system, which is a British patent.

No boiler-room or chimney is required, no labor needed to supervise the heating. The heat is produced by a system, which is a British patent.

Shall Our Monetary System Be Changed?

An Analysis By Major Strange Of Several Of The Proposals Made

There appear to be two dominant motives behind the proposals for a new monetary system. One is the desire to prevent depression. One is the desire to prevent inflation.

CANADIAN WOMEN FIND DUSTING DISTASTEFUL

Dust cloths going into discard; Unpleasant to use; a bother to wash

APPLEFORD WONDER PAPER HAS GREAT VOGUE

Of all household tasks, that of dusting is the least appealing to the majority of women.

However, this condition, like many another connected with housework, is undergoing radical changes. In a great many Canadian homes the women are discarding dust cloths entirely, and are using Appleford Wonder Paper instead, because it actually dusters—as it cleans—as it jobs them at the dust cloth ever day.

This new, and extremely modern Wonder Paper, is made from clean rags, and soft paper pulp, treated in a scientific way to make it duster. It is a paper with a high-grade fine-grained pulp, and is made in a very clean and modern factory.

Appleford Wonder Paper comes in handy-size packages, twenty-five large sheets for twenty-five cents. You can use it as a soft or wet rag, and it gives the surface a fine, clean, and polished appearance. It is sold in rolls, and you can use it as a soft or wet rag, and it gives the surface a fine, clean, and polished appearance.

When you are through, there is no old dust to shake out or wash. Throw away the used paper, and you have a clean surface. It is a paper with a high-grade fine-grained pulp, and is made in a very clean and modern factory.

Wonder Paper is made by the makers of Wonder Paper, and is sold in rolls, and you can use it as a soft or wet rag, and it gives the surface a fine, clean, and polished appearance.

Special Offer

Most grocery, hardware and department stores carry Wonder Paper. Write for a free sample. It is a paper with a high-grade fine-grained pulp, and is made in a very clean and modern factory.

Enclosed find 25c for which please send me one full-size package of Wonder Paper. I will pay for the rest of the package.

Still Observe Old Custom

German Town Distributes Bread On Anniversary Of Robber's Capture

German towns, centuries old, survive in European countries. One of these is the practice at Kitz, Germany, of distributing hot rolls on the anniversary of the capture of a notorious robber.

The bandit territory of the countryside at one period of the robber's career was a place of lawlessness. He and his men would accost any traveler who appeared without robbery, and at times descended upon towns to carry off booty and plunder.

After the robber's capture, the townspeople began to feel safer. They began to feel safer. They began to feel safer.

Just For Washing

An Irishman was relating an experience of hardship in the jungle. Ammunition, food and whisky had run out. He said: "We were parched with thirst."

"Was there no water?" asked a listener.

"Sure, but it was no time to think of cleanliness," replied the Irishman.

A Fine Dressing For Wounds—In some factories and workshops carboys of iodine are kept on hand for use in case of accidents.

The population of Rothemann was doubled with the arrival of one family—a man, his wife and their 15 children. Previously the town had 37 residents.

A new manure net is contained in a tube resembling a fountain pen.

Suffered A Severe Attack Of Dysentery

Mr. P. L. D. Moulton, Vernon, B.C., writes: "Last Summer I suffered from a severe attack of dysentery. I tried nearly everything on the market, but nothing gave me any relief, until a friend told me to use Dr. Foster's Extract of Wild Strawberry, which I did, and I got immediate relief. Now I am making it a rule to always keep a bottle of it in my medicine chest."

Wild Strawberry is a sure relief for dysentery, colic and diarrhoea, but I always see I get the genuine Dr. Foster's.

Editor and Publisher

WILL CANADIAN JUSTICE

FALL SO SHORT?

A recent news report states that in
Chicago recently machine gun threats
prompted officials of Cook County to
annul a charge of bank-robbing
against Danny McEneaney, a beer-
seller. The reporter, criminal widely
over his success to thwart the law,
walked from the court room a free
man.

After reading events of this nature it
is it any wonder that lawlessness over
run the United States? What is be-
hind this sort of thing? They make
laws and obey them. By letting
the rascals run wild they are
encouraging lawlessness, rather than
suppressing it. With law courts settle-
ments of this nature they are not
law courts of the people, but tools of
the underworld. What would happen
in Canada should a noted bank-
robber's friend or partner notify a member
of the Royal Canadian Mounted Police
that he must either lay off or get
"bumped off." The policeman would be
almost certain to do his duty in spite
of the consequences. The same can be
said of our Canadian judges. We be-
lieve that this is sound principle and
hope that justice in this country will
never fall so low as that of the United
States, as is evidenced by the above
crime. Canada has much to be thank-
ful for in having maintained the law
under the British Constitutional system,
and of having punished all ef-
fenders in spite of any threat. We
only hope that now and in the future
we will have men with enough stabi-
lity and country patriotism to fill our
judgeships and hand out punishment
according to law and evidence. As
long as this is done Canada will not
be over-run with the rascals that
exist on the citizens of the United
States.

HUDSON BAY RAILWAY

NO "FROST"

A contemporary recently remarked
that the Hudson Bay Route was a
"frost" and that the \$40,000,000 spent
in building this route was wasted,
or close to that affect. This is a mis-
take else the press report which said
the Hudson Bay was still a mass of
ice. It did not, however, cite the whole
report which stated that the ice was
moving rapidly and at that time (April
11th) reports said that the port would
soon be free of ice. At present there
are a few million bushels of wheat in
storage at Churchill waiting to be
loaded and sent to the Old Country.
Insurance rates from this port have
been lowered 25 per cent, which will
certainly indicate that the route is
not hazardous and in the three months
of open water in the last considerable
grain can be transported to England
and other European countries. The
Hudson Bay route is not a "frost." It
is a reality and the "pet dream of
many a prairie politician" and many a
tourist farmer will be realized this
summer. In fact next month grain will
move to the Old Country over the Hud-
son Bay route.

We can readily understand why our
contemporary is not in favor of the
Hudson Bay route. Being a British
Columbia politician it naturally pulls
for that province in order to do all in
its power to have grain shipments
made via Vancouver. On the other
hand, being a prairie politician, we
are doing our bit to have our own and
only prairie port patronized by the
citizens of the west, and we believe
that experiments will prove that the
Hudson Bay route is feasible and that
freight rates will be cheaper by this
route than by rail, either to Vancouver
or Halifax.

Five years in the penitentiary were
the sentence given John Turkiye and
Tom Simpson, the two Calgary youths
charged with shooting Samuel Emery,
street car motorman, on March 26.

Personalographs

Mr. and Mrs. J.H. Oliphant left last
Thursday for a couple of weeks visit
at the coast.

J. M. Macdonald had an unfortunate
accident on Tuesday evening when he
injured his knee while playing tennis.

—At Nash's, gallon fine plums, 40c;
four 1.85; Weston's creamy soda, 35c;
Dr. A. J. Wright arrived Saturday
evening from Fairview, Alberta.

Mr. and Mrs. Geo. Oliphant and son
are spending a few days in Calgary.
—At Nash's—4 lb. tin jam 35c; Pine-
apple, 2 tins for 25c.

Mr. and Mrs. O. Giesbell, of Con-
quest, who are taking a honeymoon
trip through to the Interior of British
Columbia, stopped at Carbon over the
week end and visit here with Mr. and
Mrs. E. J. Rouleau.

—At Nash's—Nabob tea, 3-lb. Caddies,
1.25; 3 lbs. coffee with cup & saucer, .85

Lawrence Poxon spent the weekend
at his home here, to be present at the
wedding.

Mr. and Mrs. A. P. McKibbin mot-
tered to Olds on Sunday. They report
the roads dry, but rough.

Miss Ruth Ramsay arrived home on
Friday evening from Edmonton, and
will spend three weeks here before re-
turning to resume her duties at the
Royal Alexandra hospital.

—At Nash's, gallon fine plums, 40c;
four 1.85; Weston's creamy soda, 35c;
Grand Forks will hold a picnic and
sports day on July 4th.

Dan Code is back in Carbon, having
arrived last week. Dan has taken a
farm near Carmox.

Miss Phyllis James and Jim Smith
were Drumheller visitors last Sat-
urday.

—At Nash's—Nabob tea, 3-lb. Caddies,
1.25; 3 lbs. coffee with cup & saucer, .85

Mr. Aaron Klassen of the Builders'
Hardware Store, expects to leave this
week end for a few days holiday.

The evening run of the Drumheller-
Calgary Bus was suspended on Mon-
day of this week.

—At Nash's, 4 lb. Rolled Oats 35c; 5
lbs. Greene Plume Prunes, 35c.
